

## KICKPRESS BASE

### COUNTERTOP HEIGHT

The Kickpress base showcases the simple but elegant aesthetic design that went into industrial equipment of the 19th century. This base allows for a countertop-height surface perfectly suited for a butcher block island, tall side board table or workbench. The design incorporates two cross bars in order to better support larger tops. The table can be customized with a spreader bar and a spacer for thinner tops. Options include our custom leveling feet with delrin glides. We will help you configure the table to suit your needs.

**Width of Surface:** 28" to 42"

 in.

**Length of Surface:** 48" to 96"

 in.

**Height:**

A nominal 36 inches. This can be customized using our spacers and leveling feet.

 in.

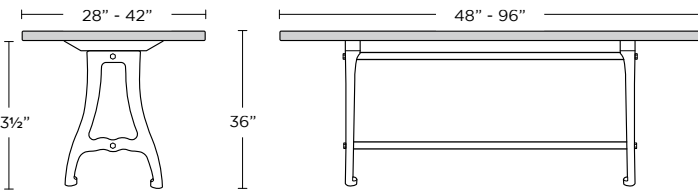

**Surface Options:**

We produce tops in a wide variety of woods including salvaged heart pine, mixed hardwoods, butcher block and live edge slab tops. We can source any material for a top that a client would like. Please inquire to discuss your desired top and finish.

**Base Options:** cast iron, cast bronze, or cast aluminum

**Leveling Feet:**
